

**Mini-Field Camp at OAI's
Gulf Coast Groundwater Research Center
2768 Barksdale Drive North
Mobile, Alabama 36606
5:30 to 8:30 PM
May 20, 2008
(18 slots left as of 4/30/08)**

The program is an outgrowth of a similar but less involved meeting of the Southwest section of the Alabama Geological Society (SWAGS). The purpose of this program is to allow PGs to brush up on some basic field methods common to all groundwater projects while earning pdh credits. **The Alabama and Mississippi Boards of Professional Geologist have authorized 3 pdh credits for those attending (please check with other states for their recognition of credit).**

Last year's program was well received by all in attendance. This year's program will provide a longer time at each station for practicing field methods associated with:

- 1 Surveying (set-up and completing a well survey)
- 2 Conducting water level surveys-correct methods for completing WLS
- 3 Potentiometric map preparation and interpretation

Following the fieldwork, the data collected will be reviewed and "graded" with a critique and discussion of the findings to follow during a grillout.

Participants are encouraged to register early as space is limited to 25. Cost of the program is \$15 for AGS/SWAGS members and \$25 for non-members. **Registration at the door is \$40. Make checks payable to SWAGS.** Certificates of attendance will be issued.

**Please mail your registration and fee to:
O'Donnell & Associates, Inc.
767 Lakeside Drive, P202
Mobile, Alabama 36693**
